PRE-APPEAL BRIEF REQUEST FOR REVIEW

Sir:

In response to the Final Office action dated April 19, 2007, Applicant would like to request a pre-appeal panel review of the application.

Remarks/Arguments begin on page 2 of this paper.

REMARKS/ARGUMENTS

Claims 1-14 and 16-26 are pending in the present application.

This request is in response to the Final Office Action mailed April 19, 2007. In the Final Office Action, the Examiner rejected claims 1-14, 16-25 under 35 U.S.C. §103(a). Applicant respectfully traverses the rejections and submits that the Examiner has not established a prima facie case of obviousness.

Pre-appeal panel review of the application in light of the remarks/arguments made herein is respectfully requested.

There are several clear errors in the Examiner's rejections and arguments.

1. Lakshman merely discloses filter rules, not an admission policy as claimed:

Applicant refers to the response filed January 29, 2007, page 12. Among other things, Applicant submits that the filter merely performs a point-location in a multi-dimensional space. Point-location is not related to differentiated service levels. Furthermore, they are not dynamically created or removed.

2. Barzilai merely discloses a statically compiled packet filter, not a classifier as claimed:

Applicant refers to the response filed January 29, 2007, pages 12-13. Among other things, Applicant submits that the filters are merely used to classify packets based on the RSVP flow which is uniquely identified by the 5-tuple (protocol, src address, src port, dst address, dst port), not having criteria corresponding to an admission policy related to differentiated service levels.

3. Barzilai merely discloses dynamic code generation, not dynamically creating and removing the filters:

Applicant refers to the response filed January 29, 2007, page 13. Among other things, Applicant submits that the code of the packet filter is dynamically compiled, not the filter being dynamically created and removed.

4. Gai merely discloses applying the prescribed policy or service treatments to the given traffic flow, not dynamically creating and removing the filters:

Applicant refers to the response filed January 29, 2007, pages 13-14, supported by arguments presented on pages 7-10. Among other things, Applicant submits that: (1) a policy or service treatments is not equivalent to a filter, (2) "applying" is not the same as "creating" or

“removing”, and (3) a “prescribed” policy means that the policy has been fixed and cannot be dynamically created or removed.

5. The Examiner mis-applied official notice in rejecting claims 12 and 26:

Applicant refers to the response filed January 29, 2007, pages 14-15. Among other things, Applicant submits that the Examiner fails to present a technical line of reasoning to show the official notice that controller dynamically removing a filter based on time of day is clear and unmistakable. In addition, Applicant submits that the Examiner mis-read Boon.

Accordingly, Applicants respectfully request the Review Panel render a decision allowing the application.

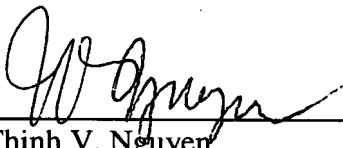

Conclusion

Applicant respectfully requests the Review Panel render a decision allowing the application.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
